SMG PRO

New!**Packed for delivery****Primary belt tensioner****6 belt drive**

The SMG has long been a very successful and useful member of the Seppi range. However as the average tractor size has increased a need has arisen for something stronger, but as versatile. The **SMG Pro** provides just this. The new machine retains the excellent original features of:

Front or Rear mount option.

Left or Right offset.

90° up and 65° down head angling.

Optional Hydraulic Offset.

Indirect Drive to the rotor through V belts, so providing a narrow drive overhang. This is important when cutting up a slope from a roadway.

Extra features of the **SMG Pro.**

6 Belt Drive [4 belt on standard SMG.]

Heavy Duty 3 point hitch frame and frame casing interface.

80 h.p. Drive.
